

Formula:

Democracy < (Equity = Power)
=
Freedom < (Equality = Stability)

Preamble:

First of all, he directly contradicts the description written on the file page that says "Interpret however you want, this is an instruction manual, not a book" by stating that an ideology like this should not be interpreted, what hypocrisy. And then he accuses us of being "Capitalist pigs" Or Marxists, as if those are the only two ideologies in existence.

Beginning:

Okay, first of all, The Author introduces us to a micronation of no importance and states that Intevanism only works if the state using it was made using it, considering it a Socialist ideology though brings up issues, Creation of a Socialist Country is not going to work out as easily as a revolution, time and time again in history proves that, a Socialist state is formed through revolution, that's why Communism is usually called revolutionary
Vellism is an oxymoronic ideology that actually has pretty good ideas such as Social Credit and Authoritarian ideals, but has bad ideas such as direct democracy, and Social Credit interfering with votes, but nonetheless is oxymoronic, Intevanism has its Social Credit that interests me, though. Chapter six introduced us more to the Social Credit system, a system where all Wages and Costs are the same price of one Social Credit, Social Credit being a metaphorical replacement of currency representing the work put in by the Proletarian. from now on I will refer to the working class as Proletarian. But an issue with this system is a lack of central Authority. If all Wages are the same, then what difference does it make to become a Doctor or just some Janitor? We must have different pay for each job, and that must be decided by a Central Authority running the country, murdering your president as mentioned in chapter 3 is immoral, Suggesting that is bad. Direct Democracy is unstable, A state cannot hold up without Stability, therefore we must get rid of the Direct Democracy and put normal representative Democracy instead.

I'm skipping over vexillology, that shit sucks.

Conclusion:

This pamphlet is super short, Freedom is the least important out of all three categories of a political ideology, a Socialist State must be reformed not created, Social Credit only works if Jobs have different pay controlled by a president, and vexillology sucks.
